SUMMARY

Last-year Artificial Intelligence student with hands-on experience in machine learning, deep learning, and end-to-end model deployment. Built and deployed production-ready ML systems. Strong in Python, data analysis, and applied ML, with experience teaching and mentoring peers.

- EXPERIENCE
- Instructor – Digital Egypt Marvels Initiative (DEMI), iSchool

june 2026 –

- Taught Programming, AI, and Game Development through hands-on sessions.
 - Guided students in projects, activities, and teamwork.
 - Mentored young learners and supported their technical growth.
- GENERATIVE & AGENTIC AI Trainee | (DEPI) round 4

December 2025 – June 2026

- Trained in Generative AI, Transformers, Diffusion Models, and RAG systems.
 - Worked on fine-tuning models and building autonomous AI agents.
- IBM Data Science Trainee | (DEPI) round 2

October 2024 – June 2025

- Completed intensive training in Machine Learning, Deep Learning, and NLP
 - Built hands-on projects using Scikit-learn and TensorFlow
 - Applied data preprocessing, feature engineering, and model evaluation techniques

- PROJECTS
- EduGen – AI-Powered Adaptive Learning & Assessment System

[GitHub](#)

- AI platform for exam generation and automated grading
 - Generated MCQs and essays from course content
 - Used student data for adaptive learning and personalization
 - Improved student performance and reduced instructor workload
- Sales-Forecasting-and-Optimization

[GitHub](#)

- Built a sales forecasting system using Python and ML in a team of four
 - Analyzed historical sales data to extract insights and trends
 - Applied regression models for accurate sales prediction
 - Optimized inventory recommendations for better decision making

- SKILLS
- Python (Pandas, NumPy, Scikit-learn)
 - SQL
 - Deep Learning (TensorFlow)
 - NLP (RAG, Fine-tuning)

- Problem-Solving (150+) on [codeforces](#)
 - Computer Vision (OpenCV, CNNs, Image Classification)
 - Git & Github
 - Machine Learning (Regression, Classification)

EDUCATION

October 6 University (2023–2027)

GPA: 3.2

Major in Artificial Intelligence – Bachelor degree

Courses

Machine Learning NTI Summer Training

Machine Learning & Data Science Diploma

National Telecommunication Institute

UDEMY

C++ Fundamentals, OOP, and Data Structures

Supervised Machine Learning: Regression and Classification

IT SHARKS

COURSERA
